

COURSE ASSIGNMENT 1: DESCRIBE AN EHEALTH APPLICATION OF YOUR CHOICE AND ITS INTENDED END USERS

Introduction

This first course assignment covers the learning content of the first two weeks of the course. We are publishing information on the assignment early, together with the Course Welcome and Week 1, in order for you to be able to start thinking about your focus for the assignment and what you will include in it. To gain credit for this assignment please make sure you check the checkboxes at the bottom of the page.

There is no deadline for completion of this assignment but in order to be awarded a course certificate you will need to have completed all assignments by the end of the course. However, to get the benefit of peer feedback in the forums we suggest you complete the assignment by the end of week 2. Please keep in mind that the discussion forum for this assignment will only be moderated during weeks 1 and 2.

Task

During the first week of this course you are asked to upload a description of an existing eHealth application or project that you find interesting on ZeeMap (alternatively post your description in the discussion forum). During the second week you will be introduced to different healthcare professionals and their roles.

In this assignment, we would like you to give us a detailed description of the eHealth application or project that you uploaded on ZeeMap (or in the discussion forum). Please write about 500 words. Make sure that your description answers the following questions.

1. What is the main aim and functionality of the eHealth application/project?
2. Who are the end users of the eHealth application/project?
3. What benefits do you see with the eHealth application/project and for whom?
4. Do you see any negative aspects with the eHealth application/project?

We suggest that you prepare your assignment in a Word document or text file on your own computer, including links to relevant resources in the body of your text. Once you are happy with your text paste the contents of the file into a post (click on Response) in this forum. You can upload images to accompany your post if you wish.

Once you have posted your response please take a moment to explore the thread and give your fellow participants some feedback on their descriptions.
